

Phurin Nararat

(+66) 62-354-5736 | Bang Bo, Samut Prakan, TH | phurin.nrt@gmail.com | www.phurinnararat.me

SKILLS

Frontend: Angular

Backend: NestJS, Python, Odoo (ERP Development), REST API, Sequelize (ORM)

Database: PostgreSQL, Redis

DevOps& Cloud Tools: Azure DevOps, Docker, Kubernetes (for load testing)

Development Tools: Jira, Git, Postman, Jam (Bug Recording)

Familiar With: React, Next.js, Tailwind CSS, Bootstrap, MongoDB

EXPERIENCE

STEEL BESTBUY CO., LTD.

Bangkok, TH

Software Developer

Nov 2024 – Present

- Develop and maintain web and ERP applications using Angular, NestJS, Odoo, and Python with PostgreSQL, Redis, and Sequelize.
- Design and implement scalable features such as KBank Payment Gateway, Odoo ERP modules, and Angular-based Back Office systems.
- Improve system performance through code refactoring, lazy loading, and backend optimization.
- Collaborate in Agile teams with PMs, POs, and QAs to refine requirements, review PRs, and deploy updates via Azure DevOps and Jenkins.
- Support QA testing, debug complex issues, and ensure data consistency across microservices.

SOMBOON SIASUN TECH CO., LTD.

Samut Prakan, TH

Automation Engineer

Jun 2023 – Jul 2024

- Programmed and tested automation systems integrating hardware and software controls.
- Collaborated on system design, debugging, and performance validation using engineering software tools.
- Strengthened problem-solving and technical documentation skills applicable to software development.

SELECTED PROJECTS

KBank Payment Gateway Integration

Developed and integrated a secure payment gateway with NestJS and Angular, enabling real-time transaction validation and seamless payment workflows within the ERP system.

Odoo ERP Custom Modules & Enhancements

Designed and implemented multiple custom Odoo ERP modules to support key business operations such as inventory, invoicing, and reporting. Enhanced core ERP functionality, optimized performance, and improved user experience through backend logic refactoring and automated report generation (PDF/PNG).

Angular-based Back Office System

Built a responsive internal management system using Angular integrated with NestJS microservices, featuring lazy loading, modular architecture, and real-time data updates for improved system responsiveness.

Redis Queue (Bull) for Asynchronous Service Communication

Implemented Redis Queue (Bull) message queues for inter-service communication across the microservice architecture, reducing system coupling and increasing scalability.

EDUCATION

WESTRIDE INSTITUTE OF TECHNOLOGY

www.we-stride.com

M.Sc. in Computer Science

Oct 2024 - Present

Specialization: Software Engineering | Expected Graduation: 2027

WESTRIDE INSTITUTE OF TECHNOLOGY

www.we-stride.com

Bootcamp, Full-Stack Development (React, Node.js, MongoDB, SQL)

Oct 2024 - Dec 2024

KASETSART UNIVERSITY

Chonburi, TH

B.Eng. in Robotic and Automation Systems Engineering (International Program)

Jul 2019 - Apr 2023

Graduated GPA: 3.65 (Achieved First Class Honors)
